Fittings NPCK

Type codes

General

The fitting NPCK is safe for use with food and fulfils all of the Clean Design requirements.

The special design for the union nut

avoids edges and areas where contaminations and microorganisms might accumulate.

The NPCK is made entirely of stainless steel and is ideally suited for use in cleaning-intensive areas. NPCK is thus

the ideal addition to Festo's existing range of Clean Design drive and valve terminal products.

Assembly:

- 1) Screw the threaded plug [1] and the sealing ring [2] on to the counterpart and tighten in accordance with the nominal tightening torque.
- 2) Place the plastic tubing [3] through the die union nut [4] on to the nipple of the threaded plug (→ Fig. 1).
- 3) Screw the union nut on to the threaded plug until it is up against the counterpart (→ Fig. 2). The tubing is thus secured and the sealing ring is pressed between the sealing surface, threaded plug, and union nut.

Dismantling:

- 1) Dismantling is completed in reverse order to the assembly.
